By and by! Ob love shall greet us, In a time that is to come, And the fears that now defeat us, Then shall all be stricken dumb!

By and by! The mournful sorrows Clouding o'er our sky to-day, Shall be gone in glad to-morrows— Shall be banished quite away!

By and by! We say it gently.

Looking on our silent dead,
And we do not think of earth life,
But of Heaven's sweet life instead! By and by! We look in yearning Toward the harbor of the blest, And we see the beacons burning In the ports of perfect rest.

By and by! Our ship shall anchor, If the tide and wind are talr, Some day in the port of Heaven, Where our lost and loved ones are.

By and by! Oh, say it softly,
Thinking not of earth and care,
But the by and by of Heaven,
Waiting for us over there! - Once a Month.

#### THE FASHIONS.

From the New York Evening Post. Dresses are not trimmed with the material so much as during the past season, although suits flouted and ruffled with the same are fashlouable. An effective style of trimming is with both ruffles and velvet, the skirt made short, with four or five narrow ruffles and a row of black velvet ribbon between the ruffles. Fringes are also to be much more used than of late, and heavy black slik is quite in vogue for trimming black alpaca walking dresses. The old style revived, of trimming with velvet and fringe, favors the modistes, as the binding and plaising of ruffles required much time, and the price charged for making did not fully pay for the extra work.

of his shipmates, clinging to a plank. He heard each of them speak of their fear-ful, position, and doubt whether they would be able to hold on: and heard them interchange the promise that if either was saved he would tell the folks at home all gbout it. It required Jordan's utmost efforts to keep the barrel in position, as the unisertow was very powerful, and so more perilous still was the endeavor to safely land upon a rocky ledge amid the terrible surf; the waves at one time heaving him toward the ledge, Dresses are not trimmed with the material the extra work.

EVENING DRESSES. The short dress, elaborately but artistically trimmed, is fashionable for evening wear, and more worn at balls than the trained and more worn at balls than the trained skirts, but for grand occasions and dinner parties the long train is the most stylish. A rich, heavy white silk, to be worn at a wedding reunion, is made with long full train, ding reunion, is made with long full train, while resting, he heard the voice of a While resting, he heard the voice of a headed by a band of silk that is studded with headed by a band of silk that is studded with small nearly. The corresponds out meeting small pearls. The corsage is cut medium high on the back and Pompadour style in front, with a fail of narrow lace around the

A beautiful carriage dress of lilac corded silk, made with trained skirt and trimmed with white satin folds and real white face The corsage is high and sleeves close, and trimmed with white satin and narrow lace.

A dinner dress of heavy black silk, at sixteen dollars per yard, has a trained skirt, and is richly ornamented with gold braid g beautiful designs. These dresses have been ordered as a part of a bridal trouseau, and the heidel dress is to be of white satin. the bridal dress is to be of white sath, the skirt plaid, but with a long, full train, and the corsage a la Pompadour, without trimbing, and with an upright fluting of lace around the neck. The bridal veil is to be of paniment to the burden of his fears.

he requested the person next to poke the The question is often asked: What other individual with his cane. The pois the best time in autumn to set out trees? lite stranger did so, and on the disturbed Can we do it while the leaves are yet person turning his head a little, John green, or wait till near winter, after they discovered his mistake—that he was not have fallen? The answer may be, do it whenever the work can be well done, and while the soil is in proper condition as to dryness for working properly. If done early, the leaves must be all first carefully stripped off, to prevent the rapid evapora- without an excuse, there was of course a tion of moisture. We have known trees ludicrous and embarrassing scene during to have been entirely spoiled in a few all of which John was profoundly interhours by wilting, from carelessness in not ested in the play. At last the man with removing the leaves when taken up. In the cane asked, rather indignantly: the Northern States, nurserymen usually commence digging by the first of October. | with my stick ?" Some trees have entirely ceased growing by this time, including generally cherries, plums, and standard pears. If the leaves are removed, they may now be taken up poke him or not." in autumn or the following spring. Others have not fully completed the ripening of the young wood, which is effected Pennsylvania is still hot after the Cables. through the assistance of the leaves. The only harm done in taking them up at this time, is in giving unmatured shoots on some parts of the trees, instead of those her husband with six children at a birth. well ripened and hardened; and the re- N.O. Picayune. sult will be that some of the tips may be nipped by the frosts winter, or they will Be not all sugar or the world will swallow thee up, nor all wormwood, or it will spit thee out.—Union Times. not start in spring with so much certainty and vigor. Hardy kinds, such as the apple, will not be much injured in this way; and the peach, although tender, should be shortened back in spring in any should be shortened back in spring in any and is afraid to sit down. Funny fix to be and is afraid to sit down. Funny fix to be can't sit down for fear of going off.—Ex

It will be safe, therefore, with a few exceptions, to take up trees any time after the first of October—care being taken to do the work well, as already indicated.

The soil should be in such condition as Intelligencer, and George Wilkes is to conduct it.

We hope Sprague's prints will not be entirely confined to domestic matters hereafter. to be easily made fine and mellow, so that it may be filled in perfectly among the roots without having interstices. Staking against wind, or effecting the same s

purpose by a mound of earth about the stem, should not be omitted.

We have never succeeded better than by taking up trees about mid-autumn, heeling them in by burying the roots and half the stems for wintering, and setting out early in spring. They, however, do quite as well set out in autumn, provided they are hardy sorts, and the site is not a windy one. In heeling in for winter, it is absolutely essential to fill in all the interstices among the roots very compactly with fine earth. Many trees are needlessly lost by carelessness in this particular. The roots are injured by dryness or mouldiness, and the mice find easy access among the cavities. To exclude mice effectually, the heeling ground should be clean and a smooth mound of earth raised on all sides about the trees. John 5.

Thomas.

This compound will be found a great promoter of health, when taken in the spring, to expel the foul humors which fester in the blood at that season of the year. By the timely expulsion of them many rankling disorders are mipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul eruptions and ulcerous sores, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, eruptions, or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no lasting health. Sooner or later something must go wrong, and the great machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation of accomplishing these ends. But the world has been egregiously deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilla, or any thing else.

contain but little of the virtue of Sarsaparilla, or any thing else.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, bitter and painful disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself is justly despised, and has become synonymous with imposition and cheat. Still we call this compound Sarsaparilla, and intend to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it. And we think we have ground for believing it has virtues which are irresistible believing it has virtues which are irresistible by the ordinary run of the diseases it is intend-ed to cure. In order to secure their complete eradication from the system, the remedy should be judiciously taken according to directions on
